IMPAACT P1092 Study Design

Phase IV multicenter open-label parallel cohort study of the steady state pharmacokinetics of 3TC, ZDV, and LPV/r
**IMPAAACT P1092 Study Design**

**Cohort 1**
- **Screening:** Within 18 days prior to enrollment
- **Follow-Up:**
  - 48 weeks total with intensive PK at Weeks 1, 12, and 24;
  - trough PK at Weeks 4, 8, 16, 36, and 48;
  - and safety evaluations throughout

**Cohort 2**
- **Screening:** Within 14 days prior to enrollment
- **Follow-Up:**
  - 48 weeks total with intensive PK at Weeks 1, 12, and 24;
  - trough PK at Weeks 4, 8, 16, 36, and 48;
  - and safety evaluations throughout
What are you questions about the study design?
